

FUJICA PANORAMA G617

Professional

Capture the Splendor

A Light-weight Large Format Camera for Sweeping Landscapes

The Wide World is Manageable with this Hard-working Panorama Camera

The Panorama G617 Professional has the unique features of an extra-wide large format camera (6 × 17 cm). Yet it is compact and maneuverable, making it particularly effective for a variety of outdoor, on-location type work.

The FUJICA Panorama G617 Professional is fitted with a high-efficiency EBC Fujinon-SW 105mm f/8 lens. The entire picture frame is uniquely bright, yielding photographs that are astonishingly sharp even at the outside edges. The light-weight body (2,310g) is extremely well-balanced for easy hand-held photography. Two shutter release buttons ensure both vertical and horizontal shots. A solid shock protector guards the lens as an extra safety feature, making the camera easy to use in the most difficult situations.

The Fujica Panorama G617 Professional is particularly well-suited for landscape, architectural and aerial photography.

- Compact, light-weight body, easy to handle
- Produces photographs that are bright and sharp on the outside edges
- Two shutter buttons for versatile use
- Built-in double-exposure prevention feature
- Lever-type film winder
- Lens shock protector
